MIGA

Safety Driven

Miga-Safety was born by two professional riders with a passion for cycling who carry more than a decade of product development experience and industry knowledge to bring a fresh style, supreme safety and ultimate performance to the cycling marketplace, initially with helmets. Miga-Safety provides products for every cyclist, ranging from urban commuters, to children, to fast moving E-bike riders, to aggressive Enduro riders, as well as professional teams. We push the boundaries of helmet safety and innovation.

 ***Series.***

E Series.

E-bike Helmets

The E1 is an E-bike helmet, at a new standard of comfort for a safe ride at the frenetic urban maze. Crowded city scenery demands the best protection solution for your own safety, which is what Miga deliver! Wrapping safety together for your perfect E-bike helmet: well-ventilated, comfortable, lightweight, and including optional eye protection with style!

E1 Helmet Details:

Fit System | Advanced Perfect-Fit system with 3-height levels

Construction | In-Mold

Ventilation | 5 wide spread venting areas with closer option

Weight | 350 gr (size M)

Certification | CE - CPSC

Sizes | M / L (54-60cm)

E1 Helmet Features:

Clear goggles

Screen visor

All Weather Shell

Quick-dry mesh pads

* Optional photochromic lenses

Photochromic Lens

These optional goggles contain special patented photochromic dyes that cause the lens to activate, or darken, when exposed to ultraviolet rays from sunlight. When the UV light diminishes, the lenses fade back. As light conditions change, the level of the tint adjusts, offering the right tint at the right time.

A wide-angle landscape photograph capturing two mountain bikers as they descend a rocky, grassy trail. The scene is bathed in the warm, golden light of a setting sun on the left, which creates a strong lens flare and casts long shadows. The terrain is rugged, with large, light-colored rock outcrops and patches of green grass. In the background, a dense forest of evergreen trees stretches across the valley, with distant mountains visible under a pale, hazy sky. The two bikers are positioned on the right side of the frame, riding away from the viewer. The one in the foreground is wearing a bright red long-sleeved shirt and a black helmet, while the second biker behind them is in darker clothing. The overall mood is adventurous and serene, highlighting the beauty of outdoor recreation in a natural setting.

Kids Helmets

Our treasures have their special needs and so our helmet support them to provide the perfect fit and protection. There are no internal contact points with the fontanel, the softest part of a developing head. The flat back allows sitting up straight while strapped into a bike seat. A soft Chin pad will avoid friction with the soft skin. In-mold structure together with 3-mode LED increases safety.

K1 Helmet Details:

Construction | In-Mold, EPS and PC combination

Ventilation | 12 vents

Light weight | +/-200 gr

Certification | CE

Sizes | XS (46-52 cm)

K1 Helmet Features;

Airflow ventilation system

4 mode LED safety light

Chin pad

Easy retention system

CoolMax inner padding

VSI **Fabric Visor.**

Attachable Helmet Visor

Increase your safety and the comfort of your ride by adding a visor to your helmet, a small addition that makes a big difference. The visor can be attached to any helmet, including kids helmets. It helps protect you from the elements, whether it be the blinding sun or raindrops.

Fabric Visor Details:

Construction | Fabric with Velcro

Dimension | 6cm width

Weight | 30 gr

Sizes | OS (one size)

Fabric Visor Features:

Bright reflective stripe

Attachable to any helmet,
including kids size.

BS1 **Speaker.**

Hands Free Bluetooth Speaker

We live the quick life pace where we want to enjoy it all: being on the move with two hands busy holding onto the bike yet wanting to be available for cellular calls or enjoying music. This led us to introduce the BS1 speaker, a hands free audio bluetooth speaker. A built- in microphone, speaker and multi-layer noise reduction, it allows you to enjoy automatic phone call answering with clear sound while riding.

BS1 Speaker Details:

Light weight | 93 gr

Audio power | 3W

Dimensions | 85x25x15mm

Dustproof and waterproof | IP54 Standard

Charging time | < 2 hours

BT connection distance | 10M

Lithium battery | 400mAh

BS1 Speaker Features:

Audio speaker for music and phone

Automatic call Answering

Multi-layer noise reduction

Built-in microphone

Attaches to helmet and can easily be removed by Velcro
